Citation: Birch JL (2015) Corrigenda: A revision of infrageneric classification in *Astelia* Banks & Sol. ex R.Br. (Asteliaceae). PhytoKeys 56: 127–128. doi: 10.3897/phytokeys.56.6517

In Birch (2015), *Astelia banksii* A.Cunn. was incorrectly stated as present in New Caledonia within the "Included species and distribution" section for *Astelia* sect. *Isoneuron* Skottsb. (page 112). The correct distribution of *Astelia banksii* A.Cunn. is New Zealand. The *Astelia* sect. *Isoneuron* Skottsb. "Included species and distribution" section should read: Included species and distribution. New Caledonia: *A. neocaledonica* Schltr. New Zealand: *A. banksii* A.Cunn.

Additionally, the designation of the *A. microsperma* Colenso *pro parte* type was incorrectly stated (page 113) as being made by Skottsberg on page 81 (1934). This type designation was made by Skottsberg on page 87 (1934). The designation of the *A. microsperma* type should correctly read:

Astelia microsperma Colenso *pro parte*, Trans. & Proc. New Zealand Inst. 17: 251. 1885 (description of fruit only). Type: NEW ZEALAND. North Island. Seventy-mile Bush, between Norsewood and Dannevirke, County of Waipawa. 1884, *W. Colenso s.n.* (Lectotype: K [000524879, digital image!], fruiting material in packet, designated by Skottsberg, 1934, 87).

Acknowledgements

I thank Jérôme Munzinger (Institut de Recherche pour le Développement) for alerting me to the error in the stated distribution of *A. banksii*.
